SUMMARY

Passionate and driven individual with experience in financial services and sales through roles at Gipros (under Credico) and
Old Mutual Limited. Equipped with a strong foundation in data science, analytics, and software engineering, developed through
intensive training at Explore AI Academy and WeThinkCode_. Demonstrated ability to merge technical and soft skills to drive
data-driven insights and contribute effectively within team environments. Successfully completed an internship at Old Mutual
Limited, gaining practical exposure to data administration and financial services. Highly motivated to continue growing in the fields
of data science and software development, with a strong work ethic, eagerness to learn, and a deep appreciation for innovation
and collaboration.
